

# Creative Transformation

Our creative process contains possibilities to unfold and develop our fullest potential. This monthly seminar series will explore the archetypal process of creative transformation as it occurs through art-making from the perspective of Jungian depth psychology. Each monthly on-line seminar will present information for discussion and inspire practical application to explore these natural, archetypal processes and their transformative potential through your own creative practice.

*The artist is not a person endowed with free will who seeks his own ends, but one who allows art to realize its purposes through him.*

C.G. Jung, CW 15, Para 157
