

How to Use Your Daydreaming In Situ Tarot Deck

Relax. Breathe Deeply. Clear your mind. The best thing about tarot is that it is completely accessible if you have a guide.

Think of a clear question. Examples include:
What guidance can the cards give me today?
Is this action in integrity for me?

Shuffle the cards in the way the feels natural to you, whether it is casino style or overhand. Do it for as long as feels correct to you.

Follow the procedure the feels correct to you.

--Using your left hand, cut the deck into three piles and rearrange as feels right. Draw card/s from the top or from the deck as you see fit.

-Or-

--Spread the cards out across the table. Pull your card/s from the spot that feels natural.

Now see what you have drawn. Look at the card and think about what the images make you think of and what they remind you of for a moment before looking up the meanings. Use both your ideas about the cards and the interpretations you read to deduce how that card brings clarity to the question you have asked.

(A downloadable PDF book to *Daydreaming In Situ Tarot* is available on my website, as well as a list of other resources)

A great way to learn the cards and their meanings better is draw one every day, asking for guidance or a thought to meditate on.

Care of your cards. Keep them in their box either on their own, or wrapped in a silk cloth. Silk can keep out other influences and energies. You may also use a cleansing smoke bundle, incense, or rinse your hands with crystal infused water or Florida water before use.
