SEE | DESCRIBE | THINK | CONNECT

David Mew is a visual artist based in Los Angeles, California. His dreamlike worlds bridge traditional digital imaging, algorithmic design, and AI tools. These works emerge from a blend of structured logic and intuitive curation, where code-driven processes give rise to visual discovery.

Originally trained in foundational drawing and painting techniques, David's approach evolved alongside the rise of digital media. He sees each new wave of technological change from early imaging software to generative coding to AI models not as a threat to creativity but as an expansion of it. Mew is an Indexed Artist in the Techspressionism art movement.

Mew's work resonates with audiences through its exploration of inner states and the environments that shape us. The **landscapes are meant not just to be seen but to be felt, offering moments of presence, curiosity, and connection.** Discover more work at www.viderestudio.com
