

Ejecta Projects 136 W. High Street Carlisle, PA 17013 - not entirely to scale

The pink walls represent available hanging space. The green wall is usable but the track lighting limits the hanging area to just 12 feet.

The space marked "A" is typically used for exhibition signage - but this is flexible.

The GRAY area cannot be used for floor work.

The majority of the usable gallery floor is 10' wide - such as the distance between the long wall and the wooden beams.

Ceilings are just under 10' high. They are not suitable for anchoring any suspended work of weight.

The wall space in the office area has limited track lighting with only about 12' of usable wall. See above.
